

Fort A.P. Hill Earth Day 2008 Celebration

More than 60 kids, parents, students and professionals from the Fort A.P. Hill family and local community celebrated the 38th anniversary of Earth Day in conjunction with “Bring Your Kids to Work day” on Friday, 25 April 2008.

A Fisheries Biologist, explains survey techniques for fisheries management

Visitors witnessed exhibits and demonstrations highlighting ongoing environmental programs at Fort A.P. Hill. The displays at Fort A.P. Hill's Headquarters area included energy conservation, recycling, watershed protection, storm water management, wildlife & fisheries management, forestry, archeology & history and safety.

A guided nature trail walk was conducted to provide participants a real-time perspective on the Army's commitment to natural and cultural resources protection and the importance of sustainability to the Fort A. P. Hill mission.

An Environmental Specialist, describes an on-going Low Impact Development

A Natural Resources Specialist, determines the age of a pine tree.

John Mullin, Fort A.P. Hill cultural resource manager, conducted a training workshop that provided an overview on basic land survey and equipment operations (Total Station, transit and global positioning systems). Participants, including students and professionals, gained hands-on experience with these systems on an active archaeological survey site.

Participants learn field survey techniques from a Cultural Resources Manager
