

6th Area Support Group, Germany Earth Day 2005 Events

6th Area Support Group (ASG), Germany celebrated the 35th anniversary of Earth Day with two events this year, a poster contest and a tour of a local water treatment facility.

Fifth grade students from elementary schools located on Patch Barracks as well as Panzer Kaserne participated in the Earth Day poster contest. Students showed off their posters in front of the commissary while handing out flyers about Earth Day and recycling to the commissary's customers.

The 6th ASG also coordinated two trips for fourth and fifth grade students to a local water treatment facility. The students learned how water is treated and supplied to customers. The students were then divided into groups to conduct experiments on turning dirty water into clean water.

The 6th ASG's mission is to provide facility support services and quality-of-life programs and activities to 12,500 service members, civilians, retirees and their families in our area of operation. This area encompasses the installations contained within the cities of Stuttgart, Böblingen, Oberammergau and Garmisch.
