

## **Aberdeen Proving Ground, MD Celebrating Earth Day 2005**

The Installation Restoration Program at Aberdeen Proving Ground (APG) participated in the City of Aberdeen's Earth Day Celebration. The event attracted more than 4,000 attendees from the surrounding community. Information was available on some of APG's latest environmental cleanup projects, in addition to copies of the Army's Earth Day poster. A community member of APG's Restoration Advisory Board, Ruth Ann Young, helped staff the display and discussed Board membership with interested members of the community.
