Subject: Conditional Approval of Site Investigation Workplan
Former Badger Army Ammunition Plant, Baraboo, WI
DNR BRRTS Activity #02-57-561617

Dear Mr. Lynch:

The Wisconsin Department of Natural Resources (WDNR) has reviewed the document entitled "Site Inspection Work Plan Settling Pond 2", dated June 2021, prepared for U.S. Army Environmental Command by SpecPro Professional Services, LLC.

WDNR conditionally approves of the workplan with the following comments:

- An additional three (3) shallow soil samples should be collected to better understand spatial variability. See the attached modified Figure 2 for additional shallow soil sample locations.
- Please provide WDNR a schedule for conducting the investigation and associated reporting. WDNR notes soil sampling is anticipated to begin in June 2021.

WDNR appreciates your efforts to investigate and remediate this site. If you have any questions, please contact me at (608) 206-5809 or luke.lampo@wisconsin.gov.

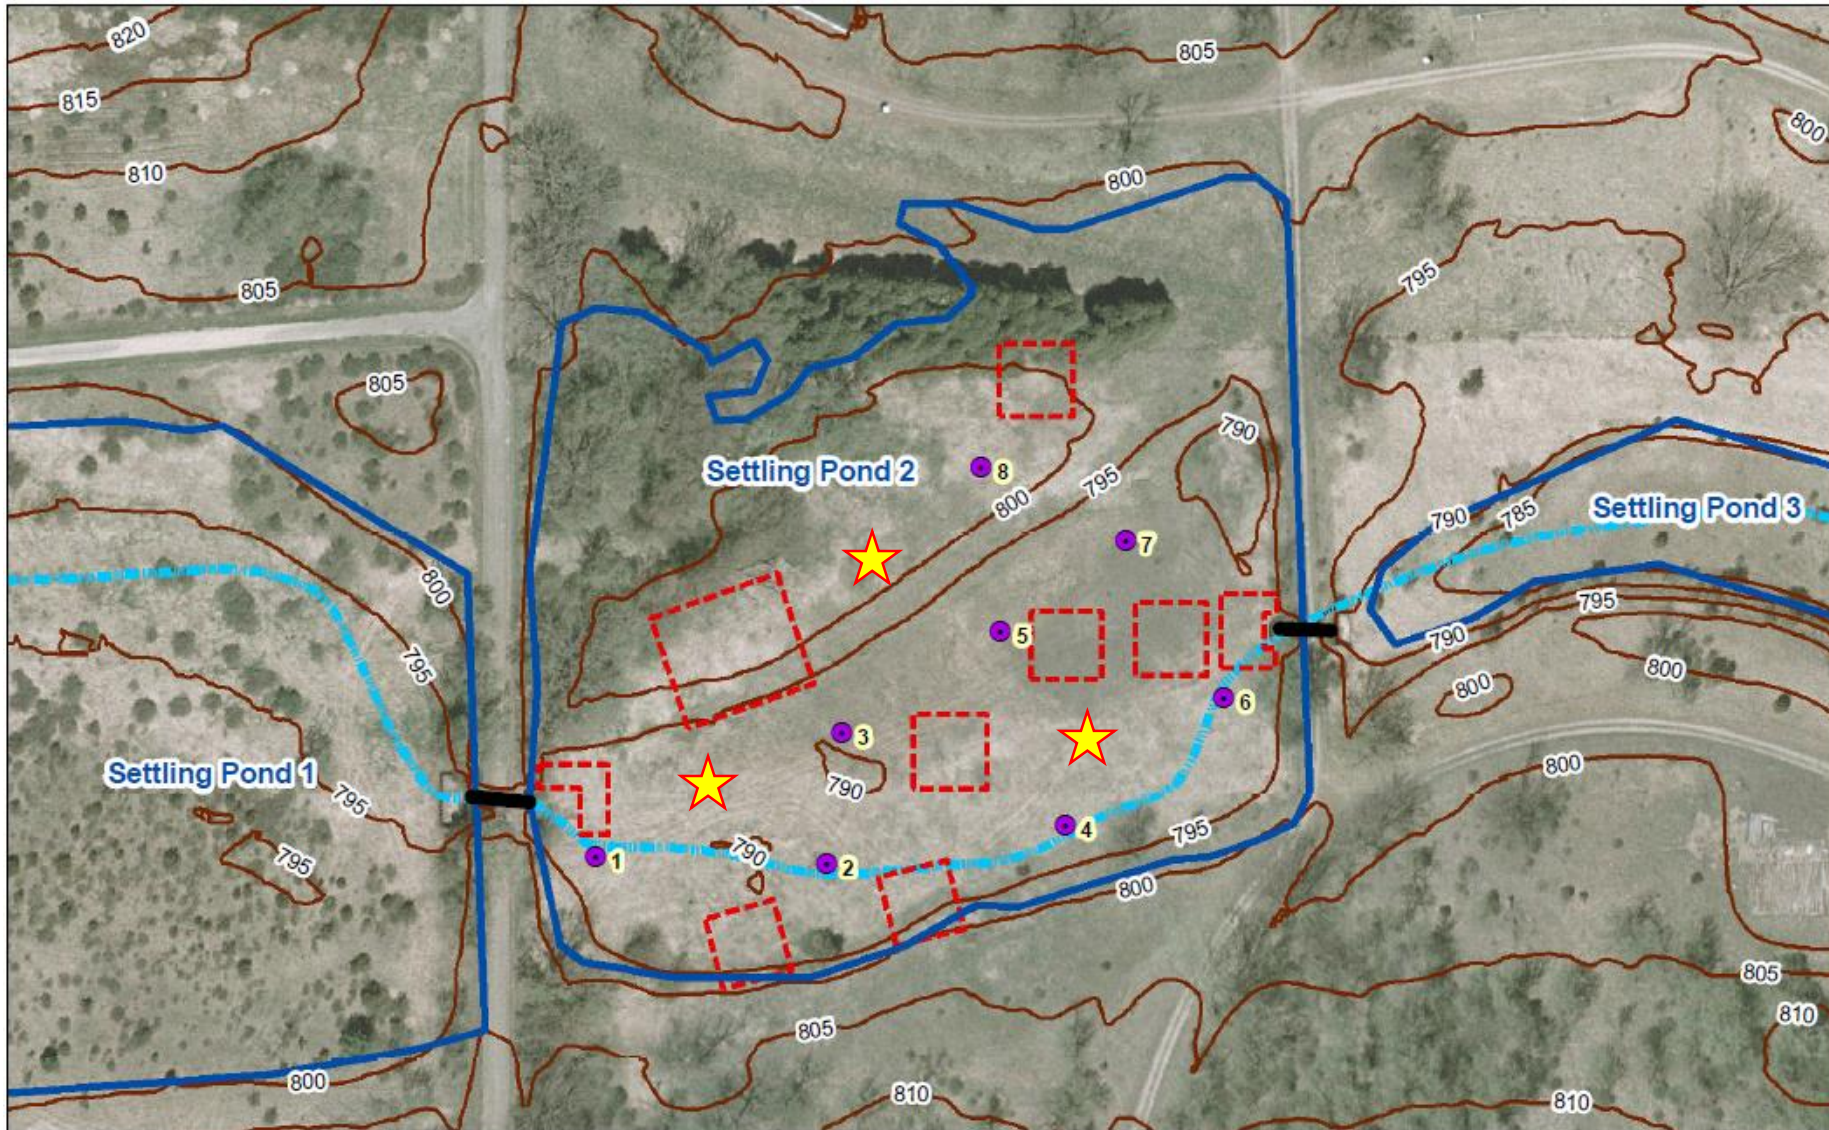

Sincerely,

Luke Lampo
Hydrogeologist
