### Site Narrative

A Preliminary Assessment (PA) was completed in 2021 at Barrigada Complex to assess potential per- and poly-fluoroalkyl substances (PFAS) release areas and exposure pathways to receptors. Based on the storage and potential aqueous film-forming foam (AFFF) release at the area of interest (AOI), there is potential for exposure to PFAS contamination in media at or near the facility.

Based on the results of the Site Inspection (SI) activities performed in January and June 2022, no further evaluation is warranted for the AOI at this time.

**Cleanup Strategy:** A Site Inspection (SI) is underway at the site and will be completed soon. No other actions are planned, and once regulatory approval is received, the site will be closed.
