## Site Narrative

The former 4.4-acre target range was used as a small arms training site. Potential munitions use included small caliber munitions. The site is currently located on private property used for grazing and open land. Munitions were fired from the northeast to the southwest toward a concrete target butt located at the base of a small hill. No documentation discussing the exact caliber of munitions use and the frequency of training activities has been found to date. The range was approximately 300 yards in length and was approximately 60 yards in width.

Defense Environmental Restoration Program (DERP) funding was used to complete work through the Site Inspection (SI) at this site. Non-DoD Owned, Non-Operational Defense Sites (NDNODS) moving forward with the Remedial Investigation/Feasibility Study (RI/FS) phase are reprogrammed into Compliance-related Cleanup.

**Cleanup/Exit Strategy** An RI/FS will be completed at this site. Once the RI/FS is completed it is assumed a soil excavation will be required.
