
PUBLIC NOTICE

U.S. Army Environmental Command (USAEC) is establishing a Restoration Advisory Board (RAB) at the former Tarheel Army Missile Plant (TAMP), also known as the former Western Electric Site

The Department of Defense (DoD) recognizes the importance of stakeholder participation in the decision-making process for environmental restoration work at TAMP. USAEC invites the community to be involved in the environmental restoration process by participating in a RAB. The RAB is intended to improve public participation by involving the community in the environmental restoration decision-making process.

RAB members were selected following the kickoff meeting conducted in October 2024. A second RAB meeting will be held on December 4, 2024, from 6 – 8:00 p.m. at the John Robert Kernodle Senior Center, 1535 S Mebane St, Burlington, NC 27215. This meeting will be open to the public to provide an overview of the RAB trainings and requirements, development of a mission statement, member roles and responsibilities, and RAB operating procedures.

USAEC is committed to encouraging public involvement to support the establishment of a RAB for TAMP. Community members who would like additional information are asked to contact Mr. Paul Humphrey at usarmy.jbsa.imcom-aec.mbx.public-mailbox@army.mil or 520-706-4587 within 30 calendar days of this notice.
