STATEMENT OF PURPOSE

The Installation Action Plan (IAP) provides evidence that the Army is firmly committed to expeditious identification and cleanup of environmental contamination, and that the installation has a credible, organized program to carry out that commitment. The IAP provides an outline of the total multi-year environmental cleanup program for each site with ongoing or future planned restoration activity and includes the (1) environmental restoration requirements, (2) the rationale for the selected technical approach, and (3) foundation to develop corresponding financial needs for each cleanup site.

INSTALLATION OVERVIEW

Installation Name: CARLISLE BARRACKS

Installation City: CARLISLE

Installation County: Cumberland

Installation State: PA

Regulatory Participation - Federal: N/A

Regulatory Participation - State: N/A

ACRONYMS

Acronym	Definition
AFFF	Aqueous Film-Forming Foam
AOPI	Area of Potential Interest
CC	Compliance-related Cleanup
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act of 1980
ENV	Environmental
FS	Feasibility Study
FY	Fiscal Year
HQAES	Headquarters Army Environmental System
IAP	Installation Action Plan
ID	Identification
IR	Installation Restoration
IRA	Interim Remedial Action
LTM	Long-Term Management
MR	Munitions Response
MRSP	Munitions Response Site Prioritization Protocol
NPL	National Priorities List
OSD	Office of the Secretary of Defense
PA	Preliminary Assessment
PFAS	Per- and Polyfluoroalkyl Substances
RAB	Restoration Advisory Board
RA(C)	Remedial Action (Construction)
RA(O)	Remedial Action (Operations)
RC	Response Complete
RD	Remedial Design
RI	Remedial Investigation
RIP	Remedy-in-Place
ROD	Record of Decision
RRSE	Relative Risk Site Evaluation
SC	Site Closeout
SI	Site Inspection
TAPP	Technical Assistance for Public Participation

Site Narrative: An investigation of the presence of per- and polyfluoroalkyl substances (PFAS) is underway. The findings of this investigation will be presented in a combined preliminary assessment (PA) /site inspection (SI) report. The preliminary assessment (PA) phase concluded with the identification of five areas of potential interest (AOPI). Building 400 current fire station; Building 400B fire station support facility; helipad and aqueous film-forming foam (AFFF) equipment testing area; and Building 301A & 325 AFFF storage area. Sampling for the SI phase was conducted June 29-30, 2020. The groundwater and shallow soil (0.5 to 2.0 feet) samples collected June 29-30, 2020, during the SI field work are below the 2019 Office of the Secretary of Defense (OSD) industrial/commercial or residential risk screening levels. Data from the SI showed PFAS at all AOPIs below 2021 OSD screening levels (below 40 parts per trillion). No Further Action was to take place and the site was expected to be closed in fiscal year (FY)23. As such, a zero cost memorandum was prepared during in the FY22 cost to complete process. Upon subsequent update to the OSD screening levels for PFAS in July 2022, and comparison to the levels from the SI, the Army determined that this site would remain open, and the investigation will move into the remedial investigation (RI) phase for Current fire station (building 400) and Fire Station Support Storage Facility (Building 400).

The Helipad – AFFF Equipment Testing Area, the AFFF Storage (Building 325), and Temporary AFFF Storage (Building 301A) have no action at this time.
