US Army Awards Performance-Based Task Order for Environmental Remediation Services at Fort Hunter Liggett and Parks Reserve Forces Training Area, CA

ABERDEEN PROVING GROUND, Md. – On March 2, 2010, the U.S. Army Environmental Command (USAEC) awarded a \$6.517 million performance-based task order to URS Group, Inc., Denver, CO, for environmental remediation services at Fort Hunter Liggett and Parks Reserve Forces Training Area, CA. The task order was awarded on the Multiple Award Military Munitions Services contract by the U.S. Army Corps of Engineers (USACE), Albuquerque District and will be administered by the USACE, Sacramento District.

The Fort Hunter Liggett and Parks Reserve Forces Training Area award is a four-year task order that includes achieving a Remedial Investigation (RI) at one Military Munitions Response Program (MMRP) site, a Site Inspection at one MMRP site, an RI and Decision Document for one MMRP site, and Response Complete at one installation Restoration Program site.

The MMRP addresses the potential explosives safety, health, and environmental issues caused by past Department of Defense (DOD) munitions related activities. Congress established the MMRP under the Defense Environmental Restoration Program (DERP) to address unexploded ordnance (UXO), discarded military munitions (DMM) and munitions constituents (MC) located on current and former defense sites.

Use of the performance-based acquisition approach requires clearly defined objectives to be achieved, measurable performance standards in terms of safety, quality, and schedule, and the method of assessing contractor performance against performance standards. The Army has found awarding performance-based contracts for environmental remediation services is a very effective means of accomplishing its cleanup objectives and benefits all involved.

Under a performance-based contract, the Army states the desired end result, and it's up to the contractor to take the necessary steps to get there. Contractors must still seek approval from the Army and regulators before implementing final cleanup remedies, and the Army still has the ultimate responsibility for the cleanup of its installations.

For more information on the U.S. Army Environmental Command, visit <http://aec.army.mil>

By providing clear definitions of performance expectations and government oversight criteria, there is a better likelihood that expectations will be reached to all parties' satisfaction. Linking payments to milestones provides incentives to develop and implement an effective and efficient approach to achieving contract requirements.

For more information on the Army's performance-based acquisition program, see <http://aec.army.mil/usaec/cleanup/pba00.html> or call (410) 436-2556.

This information is provided by USAEC. USAEC is the Army's point organization for supporting the implementation of environmental programs that facilitate sustainable Army training and operations while protecting the environment. We provide environmental program management and technical support products and services in support of Army training operations, acquisition and sound stewardship.
